

Attendance Management Software

Ver 2.0

New Features

REMOTE MONITORING

You can monitor & manage movements of your employees from your home or in travel or anywhere from the world via Internet.

TOTAL LEAVE MANAGEMENT SOLUTION

Manages Leave request, Leave approval and Leave Cancellation based on the settings like Credit period - Weekly/Monthly/Yearly. Carry Forward limit, Carry Forward elapse limit, Applicable Gender, Prefix - Suffix (Take as leave/Absent), Restriction of taking fraction of leave. Maximum leaves continuously, Combined leave restriction.

Based on this it gives Reports of leaves requested, approved, allotted and Leave balance.

MULTI BRANCH/ LOCATION SUPPORT

If your organization has multiple branch or operates at multiple locations having separate biometric device for each location, you need not to install this software separately for each premises. You can install only at a center office (ex:- Head office). This module gathers all information from devices of all locations automatically and gives you the cumulative reports.

MULTI COMPANY/ BUSINESS SUPPORT

If you are dealing with multiple company or business, each one having separate group of employees and managers. You can monitor, Manage and report each group individually with the privacy of not showing other group data to anyone, even though you are using same biometric device for all employees.

USER ACCESS LEVELS

You can restrict or permit the activities of a user, so that misuse of the software can be avoided.
